Sometimes life feels stormy. Whether due to inner turmoil or outer circumstances, sometimes it can feel like your foundation is in upheaval, like a tornado has come twisting into your life.

Tornadoes are an uncompromising force of nature with the power to change your world. It was a tornado that whisked Dorothy from comfortable Kansas to the unfathomable land of Oz. But it was through this journey that Dorothy discovered her power and helped liberate Oz. Eventually, she returned to the home she had once yearned to escape.

Like Dorothy, you may pray for change, but when it comes, how do you relate with it?

When chaos strikes — as an inner experience or an outer manifestation — find the still point within to weather the storm. As with Dorothy's time in Oz, there is a greater plan unfolding.

Chaos also speaks to creative projects you have underway. Creation is a messy process. Trust that order will emerge.
